

## **Appendix 4 – Bicycle and Pedestrian Projects**

### **Background**

This appendix presents the bicycle and pedestrian projects for the 2040 MTP. The table presents projects from the Durham-Chapel Hill-Carrboro MPO in order by municipality and county, followed by projects from the Capital Area MPO.

### **Key Information**

The table provides information about each bicycle and pedestrian project. The project number is for reference purposes and does not indicate priority.

### **Exempt Projects**

All the bicycle and pedestrian projects are deemed exempt from the air quality conformity determination according to Title 40, Code of Federal Regulations (CFR), PART 93.126. The most important implication of this exemption is that the projects may proceed toward implementation in the absence of a conforming transportation plan or Transportation Improvement Program (TIP).

## **Durham-Chapel Hill-Carrboro MPO Regional and Statewide Bicycle Routes**

A major objective of the 2040 Long-Range Transportation Plan is to identify regional bicycle routes in the Durham-Chapel Hill-Carrboro MPO region. Regional bicycle routes have several characteristics, as follows:

- Provide links between major destinations and between urban centers.
- Facilitate primarily utilitarian bicycle trips, though the routes can also serve recreational cycling.
- Serve as a backbone to a finer grained system of local bicycle routes in each jurisdiction.

The regional bicycle route map identifies a variety of corridors in need of improved bicycle facilities. The map primarily identifies on-road routes, but off-road routes are also identified. The regional routes will be evaluated from time-to-time, including future updates of the long-range transportation plan.

### **DCHC MPO Regional Routes**

In planning the regional bicycle routes, twelve specific zones of connections were targeted. The following listing shows the identified regional routes within each zone of connection:
