

2035 LRTP Bicycle and Pedestrian Projects

Summary of Networks

In response to the increased popularity of bicycle and pedestrian travel, the MPO has set a goal to create...

“a pedestrian and bicycle system that provides an alternative means of transportation, allows greater access to public transit, and supports recreational opportunities.”

To best accomplish this goal, DCHC member governments coordinate planning efforts for bicycle and pedestrian routes. Most local governments in the region have adopted their own bicycle and pedestrian plans, and the regional plan is a composite of these local plans.

As part of the 2035 Long-Range Transportation Plan, the MPO has identified the following networks:

On-Road Bicycle Network – This network includes both local and regional bicycle routes. The regional routes provide links between major destinations and urban centers and serve as a backbone to a finer grained system of local bicycle routes in each jurisdiction.

Off-Road Bicycle Network – This network includes many trail networks that connect to the larger on-road bicycle network. Not all the off-road bicycle projects are eligible for transportation funding because an off-road facility must have a significant travel or commuter function to be considered transportation, as opposed to recreation. However, the entire off-road network is included in the long range transportation plan because the public, staff and elected officials must be mindful of the off-road connections when evaluating on-road bicycle and other transportation facilities.

Pedestrian Network – The DCHC MPO does not designate a specific pedestrian network of sidewalks and other pedestrian facilities. On a regional level, the Transportation Advisory Committee has adopted a policy of inclusion for pedestrian projects within the DCHC MPO boundary. Local county, town and city governments have instituted sidewalk requirements for new development, and sidewalk upgrades are generally included in roadway construction projects. All roadway projects in the highway section of the long range transportation plan are expected to provide appropriate accommodations for pedestrians, concurrent with roadway improvements. Missing links and gaps in the pedestrian networks will be constructed retroactively and subsidized with limited MPO funding. Priority

will be given to areas with heavy pedestrian traffic generators, such as schools, parks and business districts.

The table of proposed sidewalk projects included in this report represents those projects that have been identified by the municipalities for construction.

Maps and Tables

Maps

Maps of the On-Road Bicycle and the Off-Road Bicycle networks are shown on pages 4 and 5 of this section. The On-Road network includes both regional and local facilities.

Tables

Bicycle Projects

A table of the On-Road Bicycle projects begins on page 6 of this section, and includes the following attribute information:

ID – Provides a project identification number.

Facility Description – Identifies the roadway on which the facility is to be built.

Facility Type – Identifies the type of facility to be built, including:

- **Bicycle Lane:** Separately marked lane that is for bicycle use only.
- **Paved Shoulder:** Additional pavement, commonly at least 4 feet, that has been added to an existing road to more safely accommodate bicycles.
- **Sharrows:** These are markers that are painted on a lane in which motor vehicles and bicycles are to share, often used instead of installing bike route signs.
- **Multi-use path:** A path that is physically separated from motor vehicle traffic for use by bicycles and pedestrians.

Length – Length (in miles) of the facility.

Jurisdiction – Jurisdiction in which the facility is located.

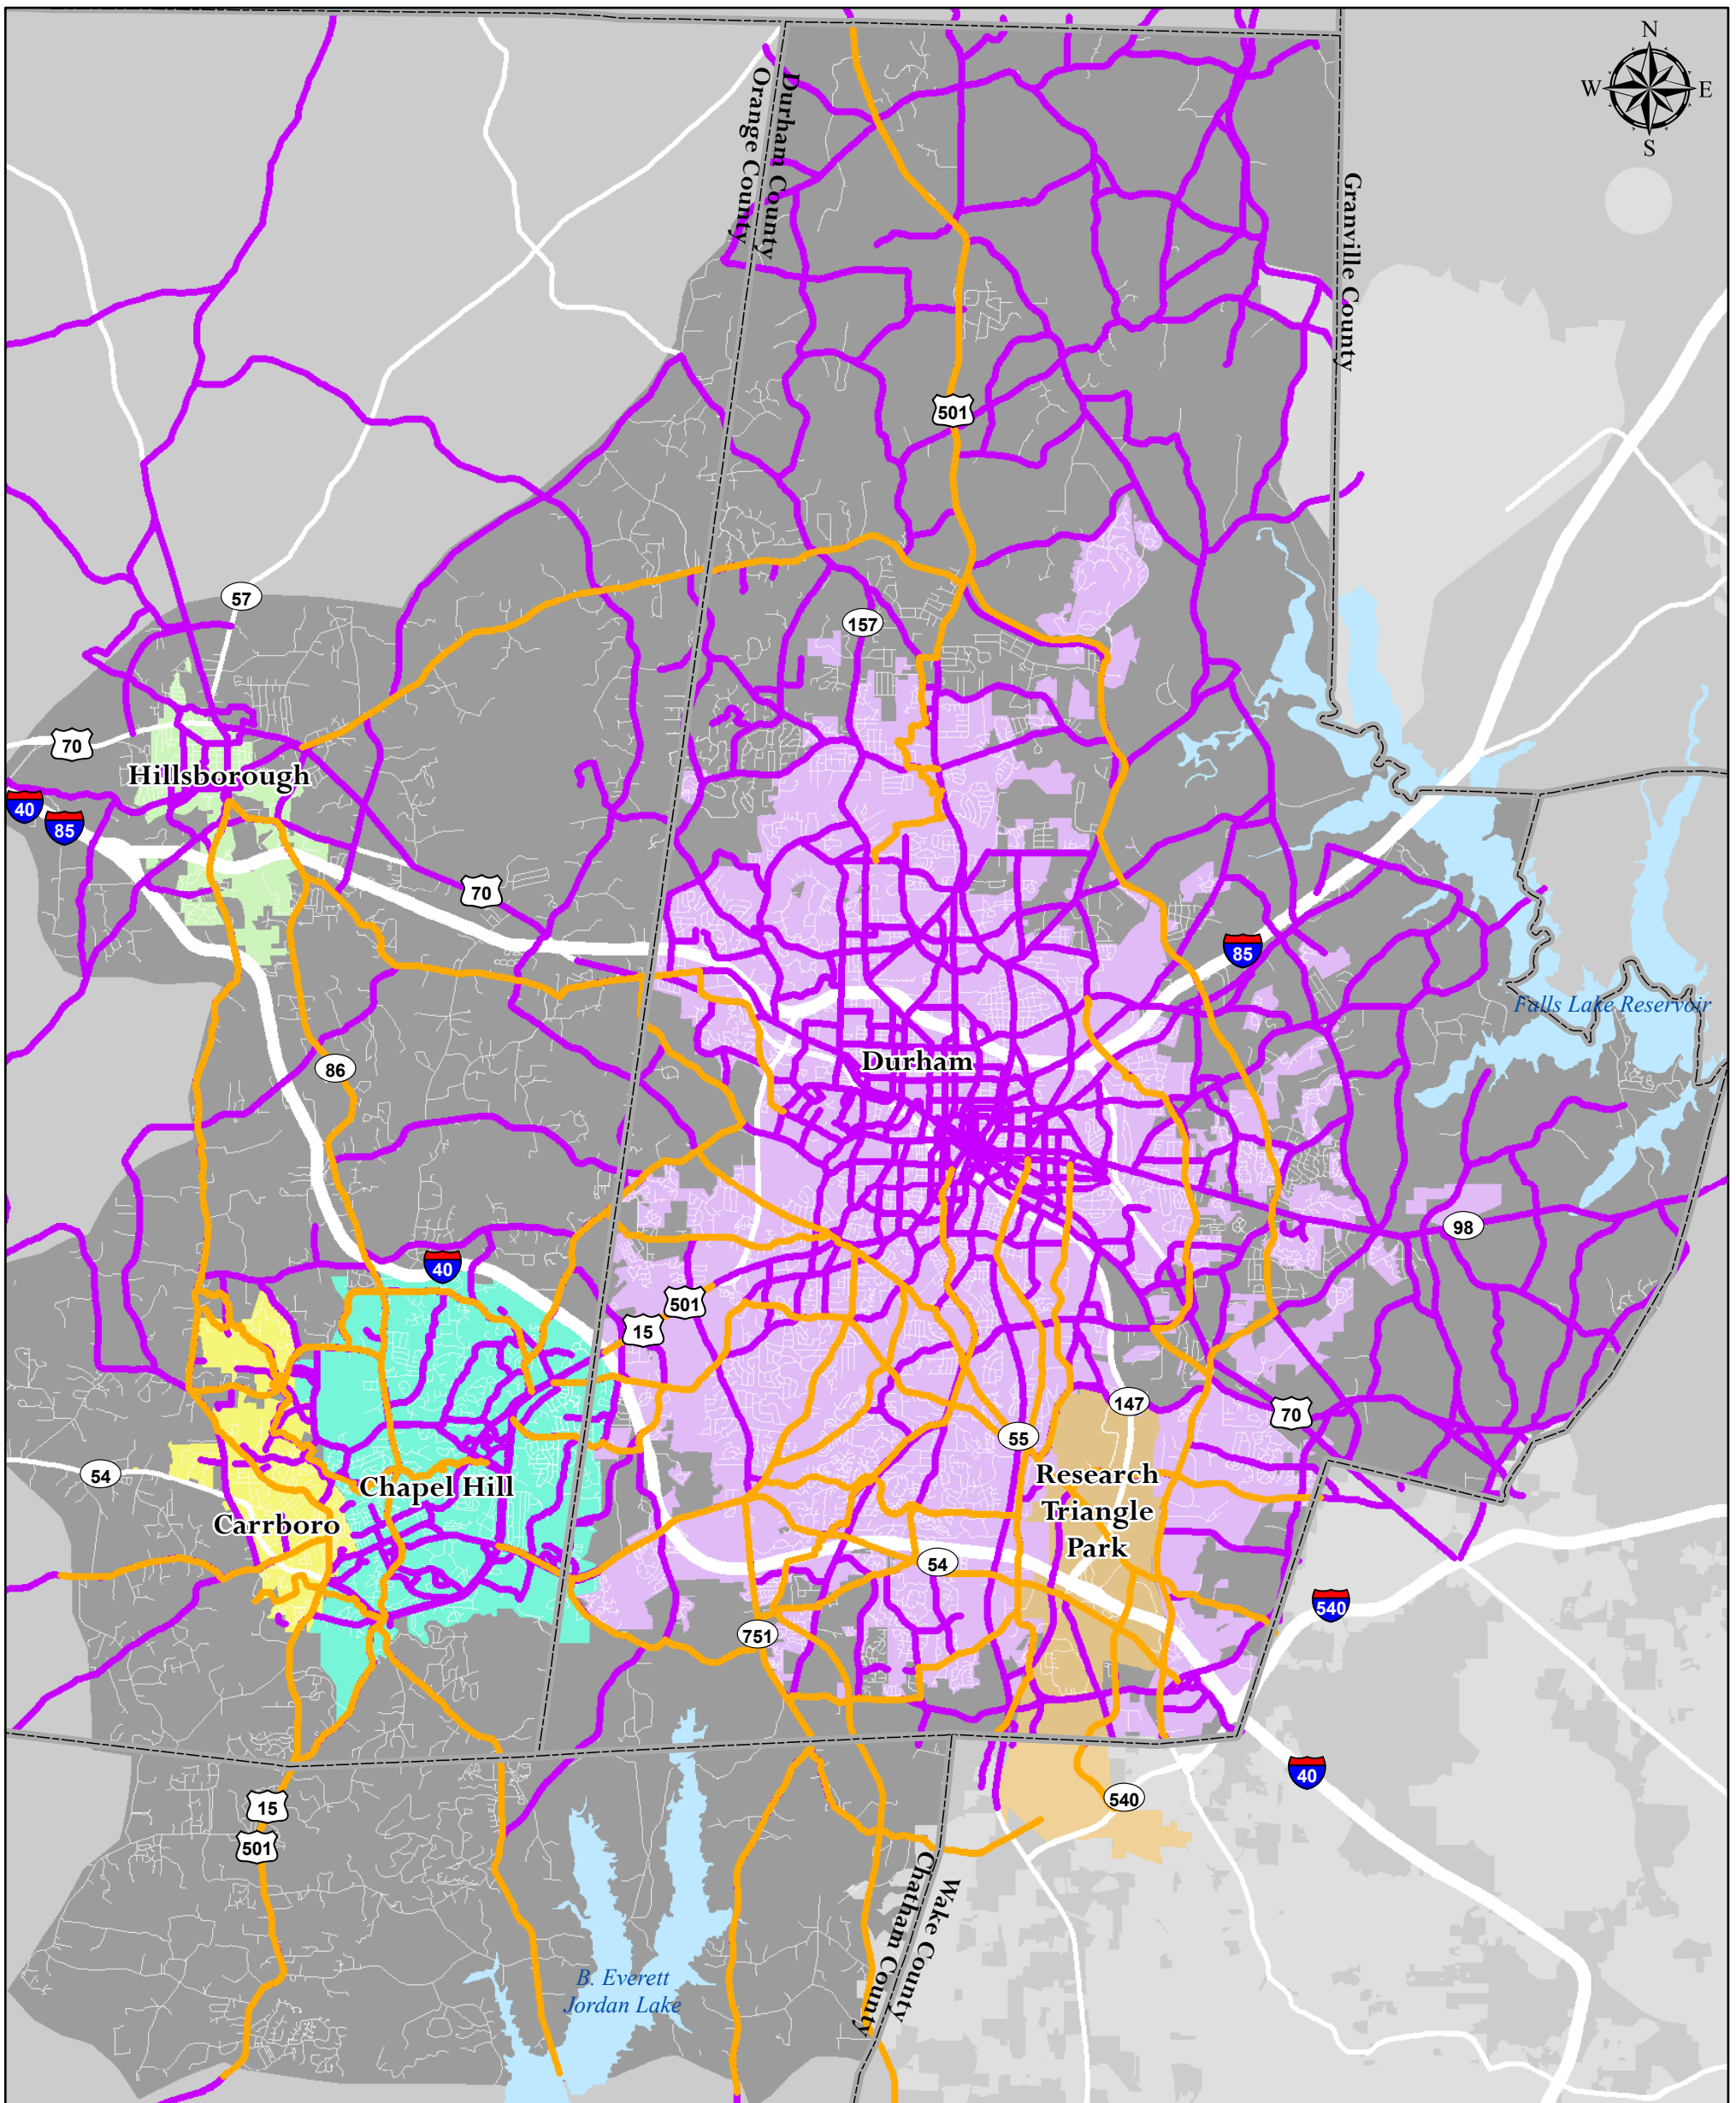

Total Cost – The expected cost of constructing the facility in year 2009 dollars. An asterisk indicates that the cost for the bicycle facility is assumed in a related highway project.

Sidewalk Projects

A table of the sidewalk projects begins on page 17 of this section and displays the key attribute information such as length and cost. The “Rank” field is only relevant for the Durham sidewalk projects – this field designates the project ranking in the City of Durham Pedestrian Plan, with the “A” designation being the highest priority projects.
